

SATHISH M

Penetration Tester | Cyber Security Analyst | Network Security

sathish1012cybok@gmail.com 8940599732 linkedin.com/in/amsathish github.com/cybok10 sathish-cyber.vercel.app

PROFESSIONAL SUMMARY

Cybersecurity professional focused on identifying and assessing vulnerabilities across web, network, and cloud environments. Experienced in penetration testing, vulnerability assessment, and SOC-based threat monitoring to strengthen security posture. Brings a hands-on, curious approach to defending systems against real-world threats.

SKILLS

Application & Web Security: Threat Modeling, OWASP Top 10, SQL Injection, XSS, SSRF, CSRF, JWT/OAuth, API Security, Application Security Testing

Penetration Testing & Vulnerability Research: Penetration Testing, VAPT, Vulnerability Assessment, Vulnerability Management, Vulnerability Scanning, Exploitation, Privilege Escalation, PoC Development, Fuzzing, CVE Research, Security Audits

Active Directory Security: Network Pentesting, Network Pivoting, DNS, SMB, NTLM Relay, Kerberos, Active Directory, Network Segmentation

Programming: Python, Bash, C/C++, JavaScript, SQL, Git

Security Monitoring & SIEM: Splunk, IOC Analysis, Threat Detection

Security Tools: Metasploit, Burp Suite Pro, Nmap, Wireshark, Snort, Recon-ng, Wazuh SIEM, PortSwigger Labs

PROFESSIONAL EXPERIENCE

Cybersecurity Researcher and Mentor, RedTeam Hacker Academy

06/2026 – Present

- Conduct offensive security research and build hands-on labs covering web/network pentesting, exploit development, and vulnerability assessment for security training programs.
- Mentor students in penetration testing methodologies, CTF problem-solving, and secure coding, guiding hands-on labs in Metasploit, Burp Suite, and Nmap.
- Develop training content aligned with OWASP Top 10 and real-world attack scenarios for aspiring ethical hackers.

Penetration Testing Intern, Cyber Nerd

08/2025 – 10/2025

- Conducted full-cycle pentests on web and network targets using Metasploit, Nmap, and Burp Suite Pro; developed Python scripts for vulnerability scanning, report generation, and system hardening.

Ethical Hacking Intern, Internship Studio

06/2024 – 08/2024

- Performed OSINT reconnaissance, digital footprinting, and vulnerability assessments; delivered CVSS-rated reports with remediation guidance and built Python automation tools for recon workflows.

PROJECTS

VulnLab – Vulnerable Web App for Pentesters

08/2024 – 12/2024

- Built a deliberately vulnerable web app covering SQLi, XSS, IDOR, CSRF, Command Injection and File Upload in an isolated Docker environment with automated CTF-style scoring.

AI-Driven Network Intrusion Detection System

03/2024 – 07/2024

- Developed an ML-based IDS using Scikit-learn/TensorFlow on live traffic captures; integrated with Snort and Wireshark for alerting and deep packet inspection.

Centralized Log Monitoring – GCP, Wazuh & Apache

10/2023 – 02/2024

- Designed a centralised log ingestion pipeline using Wazuh SIEM on GCP with anomaly detection, real-time dashboards, and Python-scripted alert workflows.

SkillPath AI Platform

01/2025 – Present

- Built a secure AI platform with FastAPI and SQLite delivering personalised cybersecurity roadmaps, applying OWASP secure coding principles.

CERTIFICATIONS

- Certified Penetration Testing (RedTeam Hacker Academy)
- Advanced Ethical Hacking – GUVI | Offensive Pentesting – Cybrary | Networking Basics – Cisco
- Linux, Network Security, Nmap – Udemy | Wireshark & Metasploit – Infosys Springboard | IoT – NPTEL

EDUCATION

Bachelor of Engineering, Computer Science and Engineering

2022 – Present

Dhanalakshmi Srinivasan Engineering College (Autonomous), CGPA: 8.6 | Perambalur, Tamil Nadu

ACTIVITIES

Mentorship: Trained 30+ students in ethical hacking and penetration testing fundamentals through RedTeam Hacker Academy

CTF & Labs: Actively solving challenges on TryHackMe, OverTheWire, PortSwigger Web Security Academy, and PicoCTF

Workshops: OWASP Community Meetup Coimbatore (Oct 2025) | 2-Day Ethical Hacking Workshop NIT (Mar 2025) | Python Workshop IIT Madras (Aug 2023)
